INFRARED SAUNA

Unlike traditional Swedish saunas that use high heat to eventually encourage the body to perspire, the Infrared heat technology used in our wooden booth uses infrared heaters and only reaches temperatures of 110-140F. The heat is gentle which makes it manageable to stay up to 60 minutes. It also penetrates deeper into body tissues at a cellular level causing a more intense detox. This means more fat is burned while less beneficial electrolytes are lost.

The sweat from an Infrared Sauna session is proven to be comprised of around 20% toxins as opposed to the typical 3% toxins from a regular sauna session. Infrared light has the ability to penetrate human tissue which in turn produces a host of anti-aging health benefits making infrared saunas one of the “hottest” therapies for overall healthier living.

Round out any spa treatment with a quick detox in our Infrared Sauna and emerge feeling balanced and restored.

Our Infrared sauna is completely private and has a capacity of 2 guests at one time.

Individual: 30-min., \$50 | 45-min., \$70 | 60-min., \$85
